DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said surveying step" in line 13 and 15. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "said recursive configuration routine" in line 13 and 15. There is insufficient antecedent basis for this limitation in the claim.

It appears that the "surveying step" is referring to the querying step of querying a printer database.

It also appears the limitation of "each authorized printer" of line 11, is referring to each assigned printer. If it is not, applicant need to define "authorized printer" because examiner would not be able to find the meaning of the term "authorized printer" in the specification that defines such term in the claims, if the meaning of the "authorized printer" in the claim is not referring to the "assigned printer."

Applicant is advised to use consistent terminology to avoid confusion.

Claims 2-5 are rejected under 35 U.S.C. 112, second paragraph because they depends on rejected claim 1.

Response to Arguments

3. The applicant presented persuasive argument on page 4-7 of the amendment filed on 9/1/2005 regarding the newly amended claims. The examiner has updated the search and believed claims 1-5 are allowable assuming that the "surveying step" is referring to the "querying step" and the "authorized printer" is referring to the "assigned printer."

The examiner's updated search and consideration is based on the above assumption.
